

Battery Caddy Assembly Guide

1. Fit and glue the main divider to the base as shown.

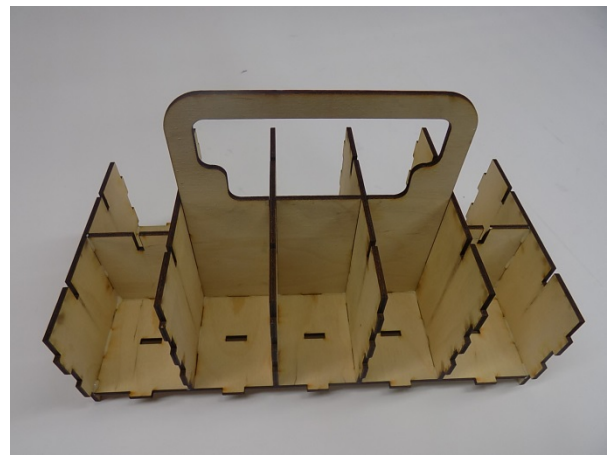

2. Fit and glue the two center dividers to the main divider and the base as shown.

3. Fit and glue the two end dividers to the main divider and the base as shown.

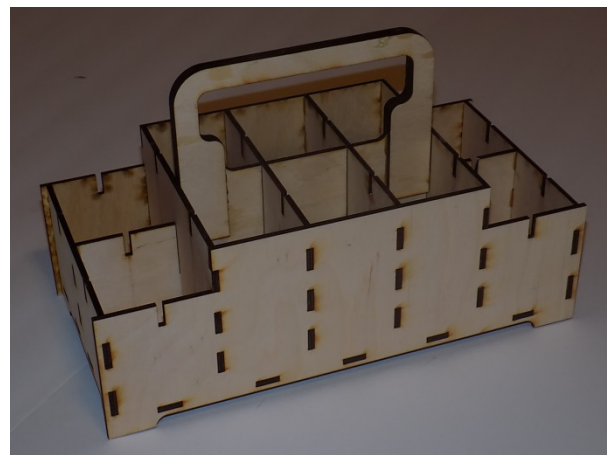

4. Fit and glue the two sides to the main divider and the base as shown.

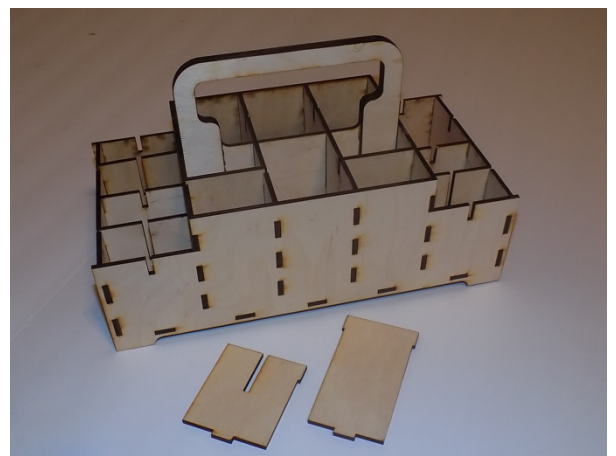

5. Fit and glue the front and back to the base, sides and dividers as shown.

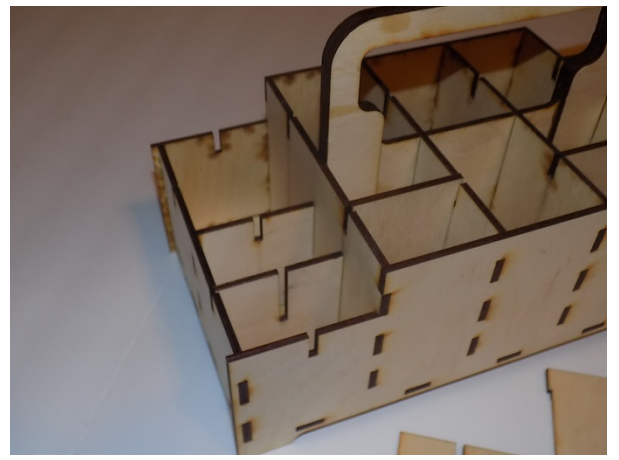

6. Glue a handle doubler to each side of the handle on the main divider as shown.

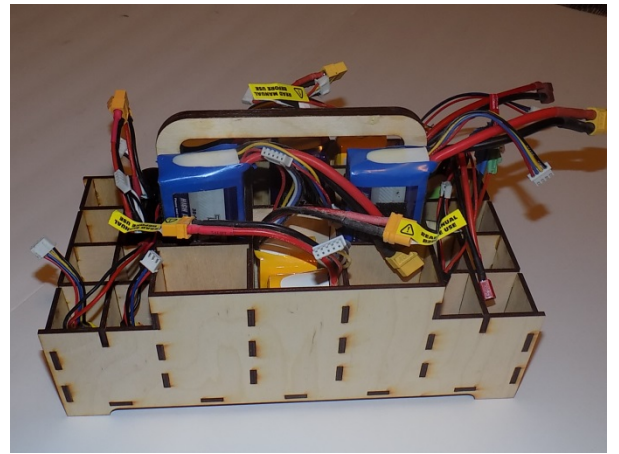

7. Configure your Battery Caddy compartments to fit your needs by inserting the main removable dividers in place. **Do Not** glue these dividers in place if you want to be able to reconfigure your Battery Caddy.

8. There are secondary removable dividers for the side compartments so they can be configured for smaller batteries.

9. Now it's time to put your Battery Caddy to work! Place your larger batteries in the center compartments and your smaller batteries in the side compartments.

10. Next, put your Battery Caddy into its ammo box and head off to the field for a fun day of flying!
